

In general:

- You can find the navigation bar on top and the footer on the bottom of each page.
 - The elements of the navigation bar change the colour, if you hover over them.
- I used an image with some leaves at the right bottom corner as a fixed background for all the pages (like here).
- I added a screenshot of every page at full screen size and a second one at a minimized screen size to this documentation.

Andrea Baumgartner - 10/2025

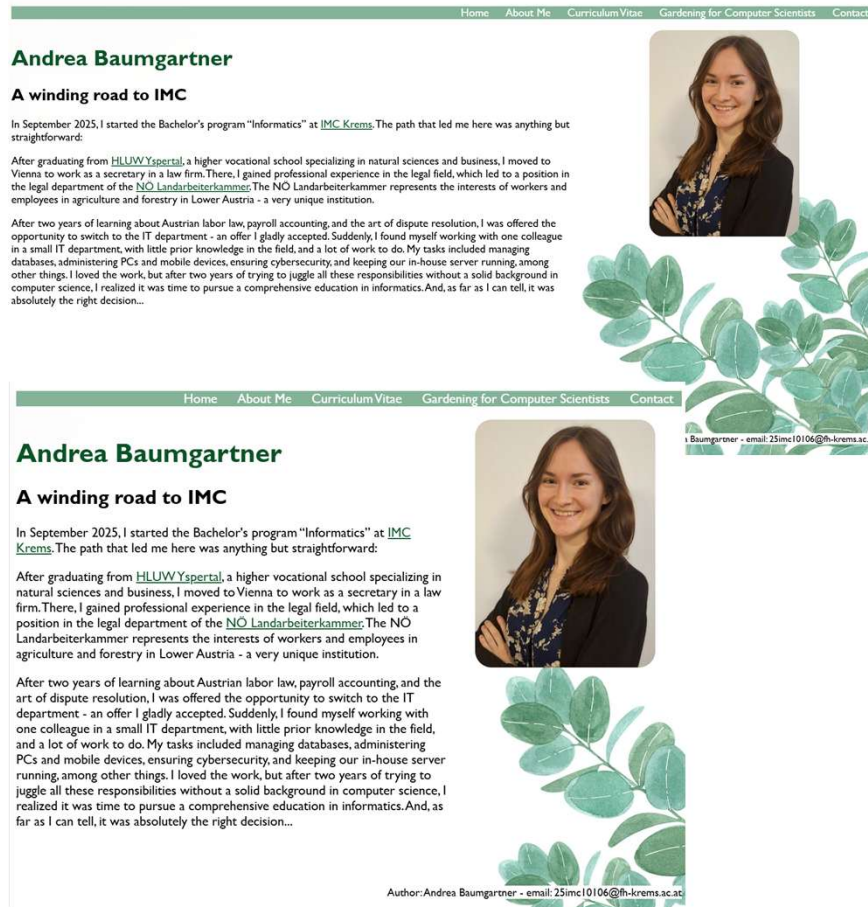

Andrea Baumgartner - 10/2025

index.html:

- There is a heading and a short text, which welcomes the user.
- Underneath there is a picture with border-radius 50% to make it round.
- I used three “divs” to position the elements.
- You can get here again by clicking “home” at the navigation bar.

Andrea Baumgartner - 10/2025

about.html:

- There is a heading h1 and a heading h2.
- Underneath there is a text about my previous career with three hyperlinks which open the linked webpages in a new window.
- On the right side there is a picture of me with rounded edges.
- The text and the image are nested into two "divs". The width and the height of the "divs" were used to position them inline-block.

cv.html:

- There are four tables for the different parts of my CV.
- The headings of the tables are made with <th> and a colspan of 2.
- Some of the elements in the first column do have a rowspan of 2 or 3, because they refer to more lines of column 2.
- The first column has a fixed width to make it look nice and clean.

Gardening for Computer Scientists

I love gardening and am convinced it is the perfect hobby for computer scientists. After a long day in front of the computer, working outside is a refreshing change. Beyond the connection with nature, you also get to enjoy high-quality, organic food - so grab your shovels and spades and start planting!

To give you a taste of gardening, I would like to show you some of the herbs and vegetables I have grown myself this year:

Gardening for Computer Scientists

I love gardening and am convinced it is the perfect hobby for computer scientists. After a long day in front of the computer, working outside is a refreshing change. Beyond the connection with nature, you also get to enjoy high-quality, organic food - so grab your shovels and spades and start planting!

To give you a taste of gardening, I would like to show you some of the herbs and vegetables I have grown myself this year:

Andrea Baumgartner - 10/2025

gallery.html:

- After the heading there is a short text about the benefits of gardening.
- Then there are 10 pictures. On a big screen there are 3 pictures in a row. If you minimize the window, there are two images in a row.
- Each image has an “alt”-attribute with a short description.
- There are intentionally no “figcaption” to maintain the clean look of the gallery.
- You can get here again by clicking “Gardening for Computer Scientists” at the navigation bar.
